Professional Summary

Accomplished full-stack developer with over 3 years of experience, specializing in responsive web design and user experience. Proficient in HTML, CSS, JavaScript, Python, Django, and React, with extensive experience in API integration and database handling using MySQL. Demonstrates a keen understanding of user needs and excels as a team player, aiming to leverage skills in web analytics and development to drive innovative solutions. Recently started journey in Mobile development, learning Dart & Flutter.

Skills

- **Backend:** Python (85%), Django (90%), MySQL (80%), API Development, Database Design, Web Scraping & Automation, Backend Engineering, RESTful APIs, Server-side Logic
 - **Frontend:** HTML (100%), CSS (75%), JavaScript (80%), React (70%), Responsive Web Design
 - **Tools & Concepts:** Git, AI/ML (basic), Machine Learning, Problem Solving, Team Collaboration, Project Management (personal projects), UI/UX Principles
 - **Emerging:** Dart, Flutter (Mobile Development)
-

Work Experience

Freelance Backend Developer | Self-employed

2023 – Present | Remote

- Develop custom web applications for clients with a primary focus on backend functionality.
- Design and build RESTful APIs, implement database solutions, and write robust server-side logic using Django and Python.
- Technologies: Python, Django, MySQL, API Development.

Web Developer Intern | Tech Startup in my University, Ede, Nigeria

2022 – 2023 | Ede, Nigeria

- Assisted in the development and maintenance of web applications.
- Worked on both frontend and backend components, focusing on implementing new features and resolving bugs.
- Technologies: HTML/CSS, JavaScript, Python, Git.

Personal Projects (Self-learning & Portfolio Building)

2021 – 2022 | Remote

- Independently developed multiple personal projects to enhance programming skills and build a comprehensive portfolio.
- Created various web applications including social media platforms, utility tools, and content management systems.
- Technologies: Django, JavaScript, React, HTML/CSS, Database Design.

Education

BSc in Computer Science | Redeemer's University Ede

October 2023 – Expected 2027 | Ede, Nigeria

- Currently in second year of study, building a strong foundation in computer science principles.

Achievements

General Achievements

- **Completed 20+ Projects:** Successfully designed, developed, and deployed over 20 web applications, ranging from simple websites to complex full-stack applications.
- **Python Developer Certification:** Earned certification in Python development, demonstrating proficiency in building applications with Python and related frameworks.

- **Growing Online Community:** Regularly active on X and LinkedIn, sharing success stories, learning progress, and insights as a 19-year-old Nigerian programmer.
- **Open Source Contributions:** Contributed to open-source projects, improving code quality and adding new features to community-driven software.

Hackathon Achievements

- 3rd Place - Datican 2025 | University-wide Hackathon

June 2025

- Won third place with an AI-powered medical diagnosis application, competing against 25+ teams.
- Developed a solution to diagnose common illnesses using machine learning.
- Technologies: Python, Django, AI/ML.
- 3rd Place - CodeWars | University-wide Hackathon

March 2025

- Secured third place by solving an educational problem using JavaScript, Python, and Django, among others.
- Competed against 25+ teams.
- Technologies: Python, Django, JavaScript.

Projects (Selected)

- **Chat Application (AI-Powered Medical Assistant):** An AI-powered medical assistant that diagnoses illnesses, prescribes drugs, gives recommendations, suggests hospitals, and links with medical professionals. (Think of it as an AI Doctor)
- **Chat Application (Text from Images):** A web application that seamlessly extracts texts from images.
- **Chat Application (WhatsApp-like):** A WhatsApp-like chat application with real-time messaging.
- **Social Media Platform:** A social media website designed for connecting students within the university.
- **VidScribe:** A website to transcribe videos, translate videos to other languages, generate subtitles, and summarize videos with AI.
- **Anonymous Messaging Platform:** A platform for sending anonymous messages.
- **Django Quickstart:** A Python package that automates the creation of Django projects, setting up projects, apps, templates, static/media files, and configuring settings and URLs.
- **Google Clone:** A functional Google search engine clone.
- **QR Code Generator:** Generates QR codes quickly for websites and text.
- **VoiceWeave:** Converts text to speech with this handy web application.

- **SpeedyDownload:** Downloads videos from various social media platforms.
